

LAFARGE VINCI

Mastering Smart Logistics

Together with Lafarge we crafted a platform that doesn't just handle orders, collect data, and whip up reports - it does it all with style and efficiency. Thoroughly tested and backed by a comprehensive guide, this platform has given Lafarge the power to streamline processes and make smarter decisions, taking their logistics operations to a whole new level.

Project Summary

Atomate has been invited to participate in a bid for the project, and after a thorough selection process, our company has been awarded the contract.

The project initiated by Holcim Group / Lafarge Moldova required a comprehensive solution that would include the full development cycle of a product - a logistics platform commissioned by Lafarge Moldova to distribute orders automatically via their supply chain, aggregate data and report on KPIs for each of the participating companies.

With a client-focused approach, Atomate conducted meticulous business analysis to gain a deep understanding of Lafarge's needs and translate them into detailed requirements. Our goal was to design and develop a robust platform that empowered Lafarge with enhanced operational efficiency, streamlined processes, and improved decision-making capabilities.

Provided Services

Atomate has worked closely with the client to document all existing and expected process requirements, as well as develop a visual representation of the application prior to implementation. The team engaged with the client to perform the following activities:

- + Analysed existing proposal and documented requirements to be implemented
- + Implemented all requirements in a series of biweekly sprints
- + Stabilised and tested the solution to ensure all quality standards were met
- + Conducted additional security testing
- + Documented the functionality of the platform
- + Conducted training sessions with the client

Client Testimonial

Partnering with Atomate was one of our best decisions. Their team exudes professionalism and dedication. The system they crafted for us has been transformative, and the journey felt genuinely collaborative.
