

IconLogin

IconLogin Limited

June 2017

www.iconlogin.com

IconLogin is a company developing innovative mobile apps, focused on innovative password management solution.

The Challenge

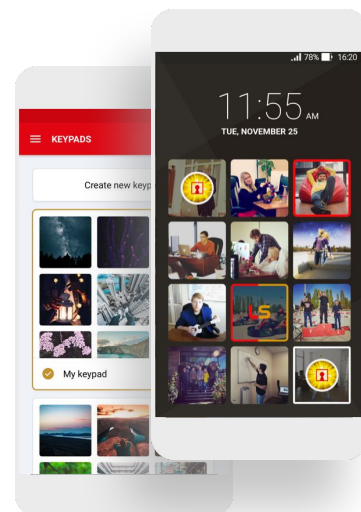

IconLogin has contracted Atomate to help develop a platform and a series of mobile applications, focused on innovative password management solution, developed and

Patented by IconLogin. The apps needed to be robust, easily configurable and very stable on as many types of Android handsets as possible.

The Solution

Atomate has developed a management platform and a modular Android solution with flavouring concept, that empowered IconLogin to produce multiple apps using same core code, but different UI. In-app purchase products are managed from the API as well as other app components.

- 3 Months required for first release
- Over 15+ applications built
- API Versioning
- Continuous support to ensure new OS are supported
- Scalable and flexible server architecture
- HealthCheck and Backups

Business Value

Lock Screen apps are a great success and obtained 10k+ organic downloads in a short period of use. Paid digital assets available via in-app purchase system have proven to

be very popular and help IconLogin monetize their offering.
